Exhibit 1: "On the Right Track" The Warren County Master Gardeners are using the educational display to educate citizens about the need for tree canopy replacement after the devastating loss of trees from the 2021 tornado. Over 4000 trees were destroyed leaving a traumatic change in increased temperatures, air pollution and psychological distress. The City of Bowling Green's canopy is now at 13% which is considered "unhealthy" and can cause an increase in energy consumption. Also, tree loss is negatively impacting wildlife. Master Gardeners were able to keep the message of the need for planting native trees "**On the Right Track**" through many venues. This display was used at Arbor Day 2025 to provide education to the public on the importance of planting more trees and restoring our canopy. Other public venues include the Bowling Green Garden Club Fairy Garden Tour at the Warren County Monarch Waystation where Master Gardeners provided educational activities, and the Cardinal Council Flower "All Aboard" Show at the Railpark to provide information to broader audiences who attended. Exhibit presented by the Warren County Extension Master Gardeners

Exhibit 2: "The Local Express – Replacing the tree canopy!" In December 2021, a tornado hit Bowling Green, Kentucky. Many trees were destroyed, devastating the urban forest canopy. Re-Tree BG was founded in response to this devastating loss in order to rebuild the lost canopy of our city. Now, their mission continues by providing education and free saplings to home and business owners who share their vision for a community with more beautiful trees. Every Spring and Fall, they have a tree giveaway, where they give saplings to people to plant on their property. Residents can sign up for a consultation, then some of our members will come to your property to evaluate if a tree would thrive there, what kind, and how much more tree cover is needed in the area.
